

Reasons to Own an EDC Directory

- ***Easy to update***
- ***Simple to use***
- ***Holds Unlimited entries***
- ***Full warranty with service plan***

EDC offers a wide variety of computerized lobby directory systems. Our products are affordable, reliable, easy to install, and simple to update.

We offer a wide selection of configurations to fit virtually every type of commercial property. EDC can replace your old back-lit or name-strip directory or retro-fit one of our various products into your current lobby directory.

ARCHITEK Wall-Mount Systems

The most affordable and simplest installations are our ARCHITEK wall mount systems. Available in 17" to 32" screen sizes, an ARCHITEK system is mounted directly on the surface of any type of wall with anchoring screws. ARCHITEK systems are available in stainless steel or virtually any other color. Custom lettering is also available.

LINEA Series Flush-Mount Systems

If you are looking for a clean, low-profile installation, our LINEA Series flush mount systems will meet your directory needs. The LINEA is designed to hold 17" to 32" screen sizes. The standard trim is stainless steel but can be ordered in different finishes, and lettering. The LINEA can also be installed in an existing back-lit directory enclosure.

Security Desk Systems

Security desks can be constructed or retro-fitted to incorporate a slim flat panel display. Virtually any lobby location can be fitted with one of our directories. We can even install a free-standing LCD monitor on a desk or any existing horizontal surface.

Kiosks

You can order an all steel kiosk with a 19" touch-screen monitor. The design requires very little floor space and is available in many different painted finishes. The kiosk unit can be bolted to the floor for stability and safety.
